# **Tech Appeal!**

Mercer Library continues to offer patrons the latest technology available

As technology grows fast and furiously at GMU, University Libraries are meeting the challenge of providing patrons with more options for research and study. Mercer Librarians, Bill Fleming and Victoria Shelton offer updated information on web pages and blogs, links to which may be found below (along with other useful Librarian sites maintained by Fairfax Liaison Librarians). These tools may be used to find the latest information in a variety of fields, and are also applicable with the broader University Libraries electronic journals and databases, found on subject specific web guides found on the GMU Libraries home page, <a href="http://library.gmu.edu">http://library.gmu.edu</a>.

In continuing efforts to better serve patrons through new and innovative technology, Mercer Library is proud to offer the above services, and may be contacted for further information at either the Circulation Desk (703) 993-8340 or the Reference Desk (703) 993-8342.

### Brush up on your library terminology!

### PRIMARY SOURCE

An original source on which other research is based. Also included are research results generated by experiments, which are published as journal ariticles in some fields. Examples include autobiographies, photographs, interviews, birth certificates, proceedings, survey research, data sets, and works of literature and art.

### SECONDARY SOURCE

A source that describes or analyzes a primary source. Examples include biographies, dictionaries, encyclopedias, textbooks, and journal articles.

### **TERTIARY SOURCE**

A source that lists, compiles, digests, or indexes primary or secondary sources such as bibliographies, almanacs, directories, handbooks, or abstracts.

# Library Hours

Spring Semester 2006

January 23 <sup>rd</sup> – May 6 <sup>th</sup>	*Subject to change due to holiday hours				
Monday - Thursday	8:00am – 10:00pm				
Friday	8:00am – 7:00pm				
Saturday	9:00am – 5:00pm				
Sunday	Noon – 5:00pm				

# Library Research Workshops Introduction to Library Research

Not sure how to find and use library information resources? This class will acquaint you with the basic elements of the research process and introduce you to the GMU library system, available electronic resources, and how to organize and evaluate information.

Wednesday, February 8, 3:00-4:30pm Monday, February 27, 3:00-4:30 pm Thursday, February 16, 1:30-3:00pm Tuesday, March 7, 12:00-1:30 pm

Sessions are held in the Mercer (Prince William Campus) Library, Occoquan (PWI) Bldg. Rm. 104J. Please call (703) 993-8348 to arrange an individual appointment.

# EndNote 7.0: Managing Your Information

Short Course: EndNote can help you organize information for both short and long term projects. Learn how to import bibliographic citations from many popular Mason Library databases into your personal EndNote database. Class will be held in Bull Run Hall, Rm 252, February 14<sup>th</sup> from 2:00 to 4:00.

Intensive Course: This course is designed for those with long-term goals and will introduce concepts of information management using EndNote for easy access and production. Learn how to customize EndNote to meet your specific needs and styles of organization. Class will be held in Bull Run Hall, Rm 250, March 1<sup>st</sup> from 2:00 to 4:00 pm.

EndNote may be downloaded from the University Libraries website, <a href="http://library.gmu.edu">http://library.gmu.edu</a>. The links are located from the drop-down menu on the left.

"This is not a novel to be tossed aside lightly. It should be thrown with great force." ~Dorothy Parker

### **E-Resources**

Featured databases and updates!

The HRAF Collection of Ethnography is a cross-cultural database containing over 350,000 pages of information on culture and ethnic groups. The electronic HRAF is produced by the Human Relations Area Files, Inc, (HRAF) at Yale University. The database is organized into cultures and ethnic groups, with full-text sources indexed at the subject level. Every major region of the world is included, and the regional divisions include Africa, Asia, Europe, Middle America, Middle East, North America, Oceana and South America. Diverse aspects of cultural and social life can be located through searching and browsing the wealth of ethnic groups found here, from Basques to religion. The eHRAF database is an interdisciplinary resource that supports study in anthropology, sociology, geography, human development and arts. GMU-affiliated researchers can access HRAF Collection of Ethnography from the Databases category on the GMU Libraries home page, or under the subject category Social Sciences.

SciFinder Scholar is and electronic database that gives the user access to the world's largest collection of biochemical, chemical, chemical engineering, medical, and other related related information. This one tool allows for a multitude of scientific information from journals and patent literature from around the world. Not only does this tool offer a wealth of information, its user interface is quite advanced allowing you to search by a variety of fields including research topic, author, company, substance name, and reaction. It even allows you to explore records based on chemical structure or biological sequence. The resources are extraordinarily detailed and astoundingly comprehensive with articles dating back a century and new entries being added continually. SciFinder is a scientific researchers ideal companion and available at the Reference Desk of your own Mercer Library.

CRC Handbook of Chemistry and Physics continues to be a ready reference book of chemical and physical data needed by physical scientists and engineers. It provides a wide coverage of data on the properties of inorganic and organic compounds. This version includes new tables, as well as updates and expansions of many superconductors; addressed environmental concerns by providing data on pollutants, contaminants, global warming, and ground water contamination; and revised data to reflect new standards. The print copy is the permier source of physical properties data, mathematical tables, and sources of critical data, chemical nomenclature, symbols, and terminology. Published since 1913, it is updated and enhanced annually. Data in the online version is presented in PDF format or in interactive table format. Users can browse or search this source for the information they need. (CRC Press, LLC)

### Mason Archival Repository Service (MARS)

MARS is a new digital repository open to GMU faculty, staff, and students. The mission of Mason Archival Repository Service (MARS) is to provide a stable, well-managed, permanent archive for digital scholarly and research materials of enduring value produced by Mason faculty, staff, and students.

Improve your impact factor. Articles freely available on the Web are cited over 300% more than articles that are not! For more information contact Dorothea Salo at dsalo@gmu.edu.

# Q. Where are there more nobles than in the royal court?

A. In the library. All the books have titles.

# George Mason & Virginian Life in the 18th Century

Unlike many of his more recognizable contemporaries, George Mason was a reluctant politician who preferred the quiet, family life. This disinclination makes his passionate participation in the political discourse leading up to the revolution all the more impressive. His dedication to freedom and just government are clear in the following excerpt, whose message still rings true more than two centuries later:

"We came equals into this world, and equals shall we go out of it. All men are by nature born equally free and independent. To protect the weaker from the injuries and insults of the stronger were societies first formed; ... Every society, all government, and every kind of civil compact therefore, is or ought to be, calculated for the general good and safety of the community. Every power, every authority vested in particular men is, or ought to be, ultimately directed to this sole end; and whenever any power or authority whatever extends further, or is of longer duration than is in its nature necessary for these purposes, it may be called government, but it is in fact oppression...In all our associations; in all our agreements let us never lose sight of this fundamental maxim--that all power was originally lodged in, and consequently is derived from, the people. We should wear it as a breastplate, and buckle it on as our armour."

-George Mason, April 1775

Retrieved 2006, from the Gunston Hall Plantation web site: http://www.gunstonhall.org/georgemason/quotes.html#liberty

### A Girl's Gotta Do...

Although it would be a more than a century before their gender could vote, American women in the 18<sup>th</sup> century did take some uncommonly bold roles in the lead up to independence. The various calls for boycotts of European products encouraged colonial women, particularly religious ones, to become involved in public actions to support the nonimportation movement. In response to the Stamp Act, 18 "Daughters of Liberty" spun yarn in Rhode Island to avoid purchasing cloth from British manufacturers. This activity was repeated in larger numbers following the Townshend Acts and involved religious New England women who proudly celebrated the excellence of American goods. In addition to the marked patriotism these events engendered, the organizers often donated the resultant flax and wool to their ministers and to needy members of the community.

Retrieved 2006, http://encarta.msn.com/encyclopedia\_761569964\_3/American\_Revolution.html#p43; Portrait: Abigail Adams, our second First Lady and an active member of the Daughters of Liberty

## An Apple A Day

George Mason, like many Virginia planters of his day, was an active gardener and orchardist. The abundance of resultant produce was used in elaborate baskets and pyramids brought out as the finale of important dinners. This fruitful hobby contributed to Virginia's famous reputation for hospitality.
