Teaching & Learning Team Information Literacy Instruction

Mason Libraries' Teaching & Learning Team helps undergraduate students build their research skills and connect with the University Libraries on campus and online. In addition to face to face and online instruction, the team offers a variety of learning opportunities to support student success at Mason including workshops and individual research help.

ENTRÉES

ENGH 101 - Internet Activism

The discourse surrounding the issue of Internet activism makes it notably relevant to the current generation. Understanding the nuances of online information is critical for future research. Lessons include:

- Developing a Research Question
- Search Strategies
- Evaluating Sources with the CRAAP test

ENGH 302 - Success, Achievement, and Leadership

To succeed in the workforce, students will need to consider future career goals. Students will research leadership styles and techniques; the things that make a company good, bad, or mediocre. Lessons include:

- Discipline Based Research
- Mining the Scholarly Conversation
- Evaluating Sources with IF I APPLY

ENGH 302 - Sustainability

As students begin researching within their discipline, they must understand how a discourse community functions and what types of evidence is needed to contribute to their field. Lessons include:

- Developing a Research Question
- Mining the Scholarly Conversation
- Evaluating Sources with IF I APPLY

ENGH 302 - Gig Economy

As students begin researching within their discipline, they must understand how a discourse community functions and what types of evidence is needed to contribute to their field. Lessons include:

- Mining the Scholarly Conversation
- Discipline-Based Research
- Evaluating Sources with IF I APPLY

ENGH 302B - Business Focused

As students begin researching, they must understand how a discourse community functions and what types of evidence is needed to contribute to the business field. Lessons include:

- Mining the Scholarly Conversation
- Discipline-Based Research
- Evaluating Sources with the CRAAP test

FAMILY-STYLE

ENGH 302 Condensed

An abbreviated version of the online ENGH 302 lesson. This online module offers the following lessons: Identifying Source Types, Searching Databases, Evaluating Sources

Zotero

Students learn how to use the free, open source bibliographic management tool, Zotero. This tool allows users to store, share, and cite sources as well as format a bibliography in any citation style.
